PRODUCT: SILVABRITE 100 WATER SOLUBLE SOLDERING FLUX

TECHNICAL DATA:

Composition	Proprietary
Type	Paste
Color	translucent clear/white/light yellow
Ph	1.0
Application	Brush, or dip
Containers	1.7 oz , 4 oz., 8 oz , 16 oz jars
Specifications	ASTM B813-91
Effective Range	250°F-520°F

SILVABRITE 100 WATER SOLUBLE SOLDERING FLUX is a paste flux that contains no petroleum, or zinc chloride. It is entirely water soluble and environmentally friendly. Flux residue removal is easy with hot water. This feature saves time and problems due to the corrosive nature of all fluxes exposed to metal after long periods of time.

It is recommended for use with torch, induction, furnace, resistance, dip and other heating methods. All WJT soldering alloys can be used with this product. Our quality control ensures a creamy consistency. **SILVABRITE 100 WATER SOLUBLE FLUX SOLDERING FLUX** can be applied using a brush, dip or other dispenser method, and has a long storage life, at least one year in unopened and undamaged container. Protection of parts and flux life under heating are excellent. Oxide absorption and solder alloy flow are also excellent on all metals.

When soldering with **SILVABRITE 100 WATER SOLUBLE FLUX SOLDERING FLUX**, the soldered joint quality is excellent. The wetting ability is excellent, and it has excellent adhesion. **SILVABRITE 100 WATER SOLUBLE FLUX SOLDERING FLUX** conforms to the various AMS, AWS and Government specifications which are listed on the flux label.

SILVABRITE 100 WATER SOLUBLE FLUX SOLDERING FLUX should not be used for brazing applications, and should be cleaned completely off parts in a timely manner to prevent corrosion.
